BOLLARD COVER

ARTWORK TEMPLATE GUIDE

YOUR ART HERE LAYER

This is the layer where you should place your artwork.

Yellow = Visible Area

Keep all important content within the yellow area. It represents what will be visible on the finished Bollard Cover.

BLEED

Blue = Bleed Area

Extend all backgrounds and edge-to-edge graphics to the blue line. This 0.25" bleed ensures full color coverage after cutting and creasing. Add it to the "YOUR ART HERE" layer.

CREASE LAYER

Green = Crease Lines

These lines indicate where the material will be creased to create the final shape. Keep important text, logos, and graphic elements away from the crease lines.

Do not move, resize, or modify this layer.

THRU-CUT LAYER

Red = Finished size

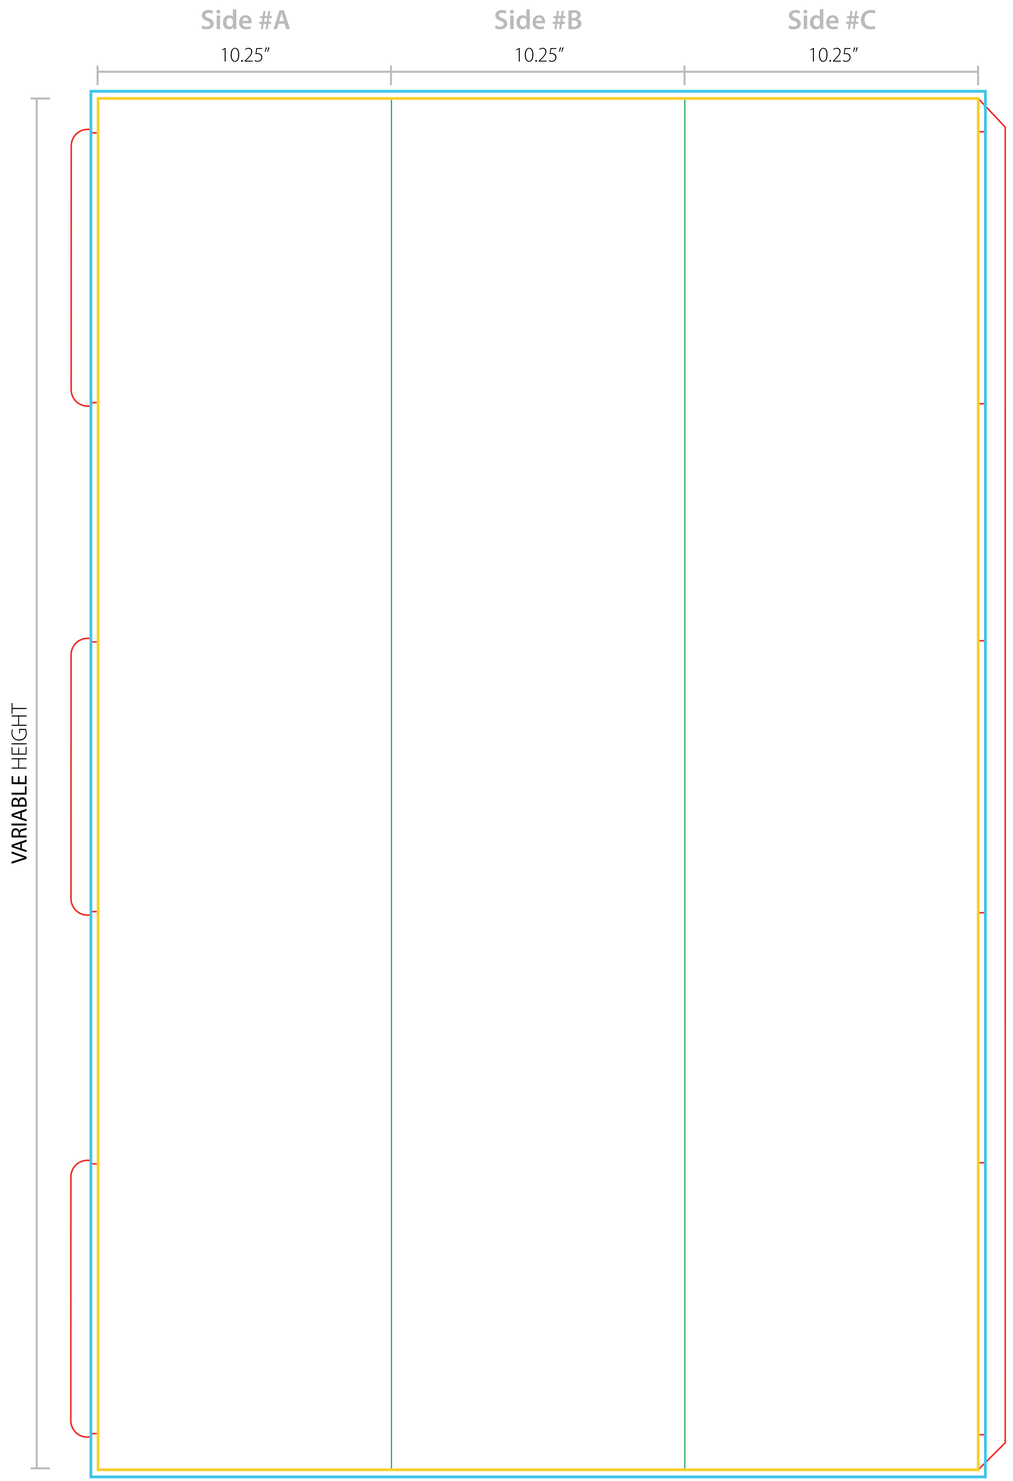

These lines indicate where the material will be cut to create a finished Bollard Cover.

Do not move, resize, or modify this layer.

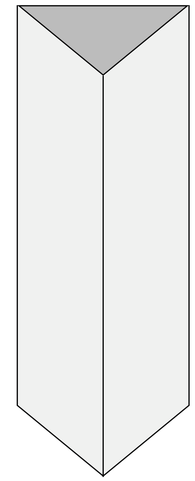

INSTRUCTIONS LAYER

This layer contains the template guidelines and setup information.

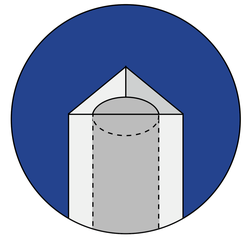

Once your artwork is complete, delete this

FINAL SHAPE

BOLLARD SIZE

FITS UP TO
9" BOLLARD

Our standard Bollard Covers are designed to fit poles with a radius of up to 9".

For larger poles, please contact us for a custom size.

QUICK TIPS

USE HIGH RESOLUTION IMAGES

Use high resolution images at their intended print size. 300 DPI recommended.

KEEP IMPORTANT CONTENT CLEAR

Keep important text, logos, and graphic elements away from crease lines and cut edges.

DESIGN EACH SIDE FREELY

Each side can feature the same or a different design. Get creative!

OUTLINE TEXT & STROKES

Outline all text and convert strokes to outlines before submitting.

REVIEW YOUR ARTWORK

Double check your artwork for accuracy and completeness before submitting your final file.

SELECT YOUR SIZE(S)

Choose the size(s) you need for your project and delete the others before submitting your final file.

IMPORTANT

Do not resize, move or modify the **CREASE LAYER (green)** or **THRU-CUT LAYER (red)**.

These layers are critical for proper folding and fit.

IMPORTANT

Save your final artwork in one of the following accepted formats:

AI | PDF | EPS

Vector files are preferred.
